I've spent most of my professional career as a software engineer but my passion has always been art and photography. In 1998, I had the opportunity to switch from engineering to digital graphic design. I've been working freelance for the past eleven years. In recent years I've taken a break to travel and provide pro bono work for charities and non-profit organizations. I am looking for challenges that will benefit from my sense of design.

**GRAPHIC DESIGN**
